

FOOTBED TECHNOLOGY

Hi-Tec's 'Comfort-Tec' insole technology, offers a superior instant comfort story to its range of products. The Comfort-Tec sockliner is a new moulded footbed incorporating a moisture wicking topcloth to guarantee you cool, dry feet. Next up is the Comfort-Tec plus sockliner, which in addition to wicking away the moisture, will help to prevent bacterial build-up and offer you odour control. Finally, the Comfort-Tec Custom insole will ensure the insole follows the form of the foot using a Memory Foam layer delivering the ultimate foot shaped fit. The Memory Foam layer combined with the moisture wicking top layer with the Poliyou® anti-bacterial and odour control treatment, in addition to the Polyurethane Heel Pad for shock absorption, will ensure an instantly comfortable ride in Hi-Tec products.

Custom Fitting

Hi-Tec's Custom Fitting footwear comes with two pairs of interchangeable footbeds for regular (7mm) or wide (4mm) fitting, allowing the wearer to tailor the fit to suit.
