

## TEC-PROOF

Hi-Tec's own waterproof, breathable porous membrane, which is extremely strong and offers full waterproofing whilst still allowing the foot to breathe.

## DRI-TEC

Dri-Tec waterproof system is a resin that is pasted onto the flip side of the upper during manufacturing which seals all seams of the footwear making it watertight. Dri-Tec gives complete waterproof protection however it does not afford the breathable qualities of Tecproof™, Event and Sympatex.

## HYDRO-TEC

Hydro-Tec is a moisture wicking comfort lining that is used on products across all categories. The micro-construction of the lining draws moisture away from the source and swiftly dries when exposed to air leaving the wearer cool and comfortable for sustained periods of time. Lightweight and breathable, Hydro-Tec is what your body needs when under exertion.

Other moisture wicking linings Hi-Tec use include Drilex® and Nylex®.

## POLIYOU®

Poliyou® is an anti-bacterial cushioning foam with superb moisture management properties found in some of our Comfort-Tec sockliners. It is 100% breathable, allowing air to pass right through to keep the foot cool and fresh. Poliyou® contains activated carbon and anti-bacterial agents to strike at the cause of foot odour before it has an opportunity to develop. The intrinsic cushioning effect of Poliyou® means it retains its shape to give the wearer an instantly comfortable feel.
