

SHOCKmaster

SHOCKMASTER HEEL PAD

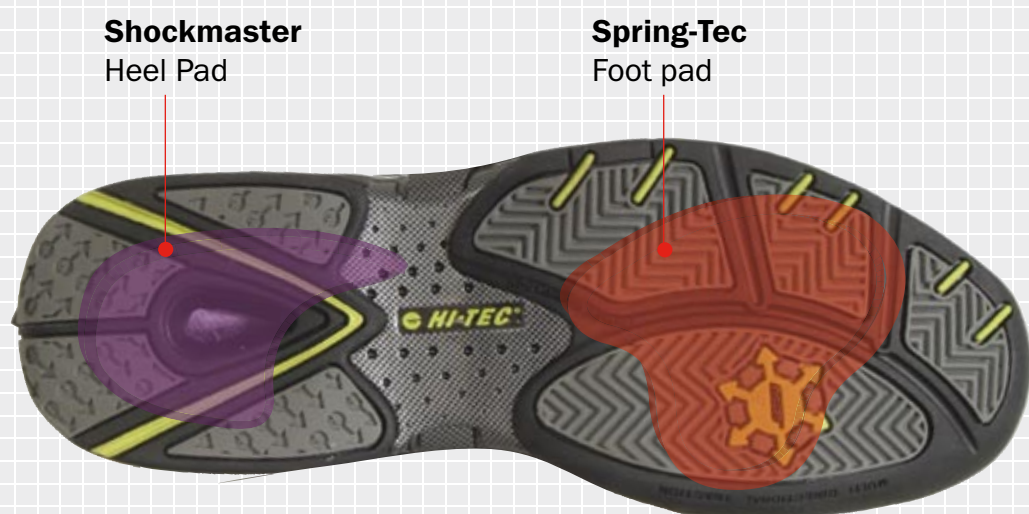

Shockmaster heel cushioning material placed in the midsole provides shock-absorbing performance during heel strike. Shockmaster effectively dissipates the skeletal shock and reverberations that occur when lunging or leaping during your game. Shockmaster heel inserts reduce the symptoms of heel strike injuries such as tendonitis and shin splints, and provide effective cushioning during play leading to reduced muscle fatigue after prolonged use.

SPRINGTEC

SPRING-TEC FOOTPAD

Springtec is a revolutionary new material designed to provide extreme energy return benefits that help to relieve muscle fatigue.

The 4mm insert used within the forefoot of the midsole on our higher price point shoes is shaped to provide maximum lift after lunging and push off during play.

Features

- Extreme energy return
- Helps relieve muscle fatigue
- Cushioned Soft feel
- Lightweight & durable with low compression set
