

WINTER INSULATION

Thermo-Dri is a unique winter boot technology designed exclusively by Hi-Tec. Thermo-Dri integrates Thinsulate insulation, seam sealed waterproofing and quality leathers with a cushioning EVA midsole, active flex points and a four layer polymer material in the heel and toe. The technology results in an insulated waterproof boot that is lightweight and flexible by design and suitable for cold weather activities.

THERMO-DRI -6+ **600 gram Thinsulate™** Ultra Insulation for Footwear is recommended for very cold conditions or for very light activity levels where wearer generates/builds little body heat through activity.

THERMO-DRI -4+ **400 gram Thinsulate™** Ultra Insulation for Footwear is recommended for cold conditions or for moderate activity levels where wearer generates/builds a normal amount of body heat through activity.

THERMO-DRI -2+ **200 gram Thinsulate™** Insulation for Footwear is recommended for cool conditions or for high activity levels where wearer generates/builds a lot of body heat through activity. Good for active wear to -20°C .

Thinsulate™ INSULATION

The best footwear insulation available, providing warmth without bulk. The micro-fibers of Thinsulate® Insulation are about ten times smaller than other synthetic insulations, making them ideal for trapping insulating air and reflecting back the body's radiant heat.
