

VIBRAM® RUBBER COMPOUNDS

Vibram® has long been the reference for high performance rubber compounds. Exclusive formulations are created for specific performance needs. Vibram® sets the standard, whether it is uncompromising grip for rockclimbing, wet-traction for sailing, maximum durability for work boots, or cushioning for walking comfort.

Vibram® Super Trek Outsole

Used for backpacking, hiking and multisport - formulated to balance the need for great traction with long wear - the most widely used Vibram® compound.

Vibram® Horsepower Outsole

Exclusively Designed by Hi-Tec for trail running and formulated to offer durability and multi traction, yet lightweight enough for trail running. This lug pattern configuration on this V-Lite sole has been inspired by the most successful traction pattern around – The horse shoe.

Vibram® Hurricane Outsole

A rugged fastpacking V-Lite compound that has been exclusively designed by Hi-Tec to deliver protection, durability and Multi Directional Traction.
